

Panel Greens by Sport Court of Texas

Natural putting greens are too much maintenance. Save yourself the time and have a professional panel green installed by Sport Court of Texas.

We install Tour Links® panel greens, which are extremely durable, weather-resistant, UV protected and color safe. These rugged panel greens weigh an average of 7 lbs. each and are easily shipped and stored. Best of all, they provide the feel of a real putting greens surface so when you practice your golf game on Tour Links, you see the results on the golf course.

Natural putting greens are too much maintenance.
